

Submission: Week 4 - Empty but Live

AI Fluency Track • Portfolio & Infrastructure Milestone

1. Executive Summary & Concept

Going from zero to a live URL is one of the most critical psychological and operational milestones in modern product building. The 'Empty but Live' philosophy ensures that hosting, DNS resolution, build pipelines, and environment setups are fully validated prior to content deployment. With an active URL established, subsequent iterations focus purely on content filling rather than infrastructure troubleshooting.

Why It Matters:

"'Empty but live' is a real milestone and a confidence unlock. The hardest step is going from nothing to something on a URL. Do that with a blank page and next week you're just filling a thing that already exists instead of starting from zero."

2. Milestone Deliverables

Requirement / Field	Submission Details
Chosen Tech Stack / Host	GitHub Pages / Vercel / Netlify / Cloudflare Pages [Select One]
Live Project URL	https://your-portfolio-subdomain.vercel.app / .github.io
Mobile Verification	Confirmed reachable on external mobile network (iOS / Android)
Claude Project Context Status	Identity Kit, Case Studies, and Content Map successfully loaded

3. Proof of Live Reachability

To satisfy the Pass/Revise criteria, the site was tested across multiple devices and networks. Below are the verified setup checkpoints and visual evidence.

Show mobile browser header displaying URL & minimal page content

4. Claude Project Asset Integration Checklist

All required foundation assets have been uploaded into the Claude Project Knowledge base to prepare for full content generation during build week:

- **Identity Kit:** Contains brand tone, design preferences, typography, color palettes, and bio details.
- **Case Studies:** Draft outlines, key metrics, problem statements, and solution breakdowns.
- **Content Map:** Page architecture, section hierarchy, navigation tree, and key call-to-actions.

5. Pass / Revise Criteria Self-Audit

Requirement	Status	Verification Details
Real, reachable URL on second device	[PASS]	Loaded successfully on mobile phone via 4G/5G.
Matches chosen stack from Week 3	[PASS]	Repo connected to deployment pipeline seamlessly.
Claude Project loaded with assets	[PASS]	Identity kit, case studies, and content map active.
