

U-DRIVE Portfolio Identity Kit

Deliverable: Visual Identity & System Style Specification for Portfolio Build

1. Typography Selection

A minimal, high-contrast paired font stack designed to maximize legibility and professional authority across all screens.

Type Role	Font Name	Usage & Technical Purpose
Heading Font	Montserrat (Bold / Semi-Bold)	Used for hero titles, section headings, project headers, and navigation logos. Delivers a clean, premium automobile editorial feel.
Body Font	Inter (Regular / Medium)	Used for case study paragraphs, code logs, metrics, and technical descriptions. Highly readable screen typography with optimized kerning.

2. Color Palette System

A tight 4-color palette inspired by the U-DRIVE dark pink & lavender visual language. Designed to keep focus on portfolio case studies without visual noise.

Palette Role	Hex Code	RGB Value	Application Context
Main Accent	#800040	RGB(128, 0, 64)	Primary brand color, primary CTA buttons, active state indicators, key metrics.
Near-Black Text	#111827	RGB(17, 24, 39)	Body copy, primary headings, structural borders. High contrast legibility.
Near-White BG	#FAFAFC	RGB(250, 250, 252)	Page background, container canvases, clean white space framework.
Soft Accent (Lavender)	#E6E6FA	RGB(230, 230, 250)	Secondary badge backgrounds, card subtle hovers, focus highlight rings.

3. Logo & Favicon Specification

The portfolio logo and favicon utilize a clean, modern monogram set in Montserrat Bold. It represents both personal identity and the U-DRIVE automobile engineering brand context.

4. System Style Note (Claude Project Context)

This 2-line style note is added directly into your Claude Project or AI system context to enforce absolute visual consistency across all generated case studies and UI pages:

Style Note:

Fonts: Montserrat (headings) and Inter (body).

Palette: #800040 (deep dark pink accent), #111827 (near-black text), #FAFAFC (near-white canvas), #E6E6FA (soft lavender hover accent).

Mood: A high-contrast, disciplined automotive-editorial space that feels intentional, premium, and calm, letting technical proof and case study engineering carry all the visual weight.
