

Portfolio Content Map & Through-Line Strategy

FlyRank AI Internship — Week 03 Deliverable: The Through-Line

1. The One-Line Claim

After iterating through multiple AI options, the claim was sharpened to deliver a single, memorable sentence. It directly states the proof value proposition and sets up the primary call to action.

🎯 **Selected One-Line Claim:**
“I build high-performance React and Next.js web applications using AI pair-programming to turn complex frontend requirements into production-ready software.”

2. Portfolio Content Map

The content map establishes the exact hierarchy of pages, section sequences, case placements, and primary calls to action (CTA). All CTAs ladder up to the Week 1 goal: scheduling a technical interview / hire request.

Page Name	Ordered Sections	Lead Case Study	Call to Action (CTA)
Home Page	1. Hero (Claim) 2. Featured Work 3. AI Engineering Workflow 4. Contact Footer	U-DRIVE Automobile E-Commerce (Strongest Proof)	'View Case Study' / 'Schedule Interview'
Case Study: U-DRIVE	1. Problem & Scope 2. Architecture & State 3. AI vs Manual Log 4. Code Screenshots	U-DRIVE React/Next.js Application	'Inspect GitHub Repo' / 'Test Live Demo'
Workflow / Proof	1. AI Prompt Logs 2. Refactoring Lessons 3. Hydration Fixes	U-DRIVE & Component Architecture	'Read Full Breakdown' / 'Contact Author'
About / Contact	1. Author Background 2. Skills & Stack 3. Direct Links	Personal Development Journey	'Get In Touch' (Primary Ladder CTA)

3. 'Still Need to Gather' Audit List

An honest tracking list of remaining proof assets and pending deliverables so build week is not blocked:

Asset Needed	Current Status	Action Plan & Target Date
Vercel Live URL Verification	Ready	Verify live domain responsiveness across mobile and desktop viewports.
High-Res Code Screenshots	In Progress	Capture clean, cropped code blocks in VS Code showing Cart Context hydration fixes.
Lighthouse Performance Score	Pending Build	Run Lighthouse audit on production Vercel build to record load speed metrics.
Final Internship Assessment	In Progress	Incorporate FlyRank Week 3 feedback and finalize track thread submissions.
